

THE ONLY ZERO THREAT PROVIDER

Xcitium offers comprehensive solutions (EPP + EDR, MDR, XDR) for endpoint protection, detection, and response, all integrated into our user-friendly platform. Traditional Endpoint Security does not detect unknowns, allowing malicious threats to get through and infect the network. Xcitium's patented ZeroDwell Containment technology uses kernel level API virtualization to isolate and remove threats like zero-day malware & ransomware before they cause any damage.
