

INFINIDAT

Herzog's Dirty Dozen

The challenges, gaps, misconceptions and problems that keep CxOs, storage admins and other IT leaders up at night

1 Insufficient level of cyber resilience

2 Disconnect between cybersecurity and enterprise storage

3 Storage proliferation

4 Lack of utilizing flexible consumption models

5 High total cost of ownership

6 Slow data recovery after a cyberattack

7 Slow application and workload performance

8 Reliance on an outdated architecture

9 Lag in making storage more green

10 Misunderstanding about hybrid cloud

11 Lack of autonomous automation

12 Underperforming storage vendor IT support

Follow Infinidat on social media for our most current updates on trends, insights, advancements, and best practices for cyber resilient data storage.
