## TECHNOLOGY: XCITIUM ZERO-DWELL SOLVES CYBERSECURITY'S NEED FOR SPEED

Undetectable Threats (aka "Unknowns") are where malicious attacks and ransoms hide! Detection-first vendors cannot detect Unknown files and objects as potential threats because they have no recognizable signature or hash. For this reason, all detection-first vendors simply allow ALL Unknowns to enter customer environments and **dwell** therein (performing stealth reconnaissance and privilege escalations) until they finally raise suspicion, ransom the business, or detonate to become fully detectable and actionable! **THIS IS WHY BREACHES KEEP HAPPENING.**

REAL TIME ZERO TRUST: No other security vendor except Xcitium acts on every single file and object entering a customer's network, including all and any Unknown, Undetectable files and objects. Xcitium's patented, proactive **DETECTION-LESS VIRTUALIZATION** instantly ushers all Unknowns into containment, at machine speed and by default **- ALL UNKNOWNS ARE GUILTY TILL PROVEN INNOCENT -** instantly eliminating attacker dwell time, and preventing Unknowns from causing any damage to real assets, and all without any interruption of endpoint productivity or business operations. Contained attacks are no longer threats, so while Unknowns undergo verdicting right there on the endpoint, ZeroDwell continues working in parallel with Xcitium's integrated detection-based strategies as well to accelerate threat hunting and harden environments against future attacks. Xcitium delivers the difference between detection and genuine defense-in-depth protection.

DETECTION-LESS + DETECTION-BASED TECHNOLOGIES: UNIQUELY INTEGRATED! This is the **Whoa!** you've been waiting for.
Xcitium exceeds the critical need for speed in cybersecurity, getting well ahead of malware and ransomware attacks, with ZeroDwell.

PRODUCT BUNDLES: EPP | EDR | MDR | XDR | MANAGED SOC (Security Operations Center)

Xcitium Core	Xcitium Essentials	Xcitium Advanced			Xcitium Guided	Xcitium Managed	Xcitium Complete
VISIBILITY	PREVENTION	PROTECTION	DETECTION	REMEDIATION	GUIDED	MANAGED	COMPLETE
EDR	ZeroDwell Containment	Advanced Endpoint Protection	Endpoint Detect & Response	Endpoint Manager	Guided	MDR	XDR
Open Source EDR provides visibility & 3-days of free storage on the Xcitium Platform	Protect against the execution of all unknown threats with patented isolation technology	Secure endpoints with antivirus, HIPS, firewall, NGAV, & ZeroDwell Containment	Gain complete visibility across endpoint and networks to enrich root-cause stories	Reduce the attack surface with patch management and remote remediation	24/7 SOC Monitoring with High fidelity alerting	Xcitium Advanced + a fully managed service providing people, process and Xcitium technology	Xcitium Managed + Xcitium's network sensor / cloud APIs for 3rd party data consumption

XCITIUM DEFEATS THE UNDETECTABLE

> **See** actual **ATTACKER DWELL TIMES** from Unknowns no detection-first vendors can detect on their way to becoming ransoms and breaches.

> **See** Xcitium's exemplary protection-first statistics! - **XCITIUM TRANSPARENCY - HISTORICAL PERFORMANCE**

> **See** the threats actively lurking in your environment (that your detection-first vendor missed)! **GET A FREE FORENSIC THREAT ASSESSMENT!**

DEEP TELEMETRY: XCITIUM'S EDR | MDR | XDR CONTINUOUS MONITORING & VISIBILITY

INFILTRATION	BACKDOOR INSTALLATION	COMMAND & CONTROL	EXECUTION	PERSISTENCE	ESCALATION OF PRIVILEGES	LATERAL MOVEMENT	EXFILTRATION
Spear Phishing Attack	Exploits	Malicious Network Operations & Reconn	Malware & Ransomware Attacks	Registry Modifications	Privilege & Identity Misuse	WMI Abuse	Data Theft & Exfiltration

xcitium

Xcitium, formerly known as Comodo Security Solutions, is used by more than 5,000 organizational customers & partners around the globe. Xcitium was founded with one simple goal – to put an end to cyber breaches. Our patented Xcitium Essentials ZeroDwell technology uses Kernel-level API virtualization to isolate threats like zero-day malware & ransomware before they cause any damage to any endpoints. ZeroDwell is the cornerstone of Xcitium's endpoint suite which includes pre-emptive endpoint containment, endpoint detection & response (EDR), managed detection & response (MDR), and managed extended detection and response (XDR). Since inception, Xcitium has a track record of zero breaches when fully configured.
